ORDER:

In the circumstances reported by the Chief Engineer, NTR TGP, Tirupati in the references 2nd and 3rd above, Government after careful examination of the proposal, hereby accord permission to allocate 0.785 TMC of water for drinking water supply to Chittoor Municipal Corporation from Adavipalli Reservoir, subject to following terms and conditions:

- 1) The MDDL of the reservoir is +480.000 M where the capacity is 0.590 TMC. The Dead storage of the reservoir is +477.000 M with 0.403 TMC capacity. Further, the drawl of water for P.H. Dept., can be allowed at the level of +473.000 if it is necessary in emergency provided proper approval from Competent authority and in no case allowed below half dead storage level i.e. 0.200 TMC as the scheme is for drinking water needs of entire Chittoor Municipal Corporation and the same may be approved.
- 2) Water can be drawn from the reservoir without disturbing/interfering the earthen bund of reservoir.
- 3) The intake well should be at minimum of 10H from toe of the reservoir of the bund and 30M from FTL of reservoir whichever is greater.
- 4) As there may be chance for improving /modification of earthen bund may arise in future, the pipe line of the P.H. Dept., shall be avoided on earth bund. The existing hillock can be utilised for the above purpose.
- 5) The Public Health Department shall not have any right to draw water without permission from the WRD Department.
- 6) The water shall be utilized for the purpose for which it is allotted.

(P.T.O)

- 7) The water rates payable shall be as levied by the Government as per the norm of water supply from time to time.
- 8) The cost for construction of suitable size of intake well and laying of pipeline including further maintenance if any shall be borne by the Public Health Department.
- 9) The Public Health Department shall take up all the LA problems that may arise during course of execution of the said work.
- 10) The Public Health Department shall enter into agreement with Water Resources Department if any needed in this regard.
- 11) A detailed plan showing the location of intake arrangements, pump house, alignment of pipeline and conveyance system should be furnished to the consent department for approval.
- 12) While laying pipe line, the Public Health Department should take care that there is no damage caused to existing bund and canal system. For this, sufficient distance from the toe has to be maintained. If any damage is caused, the Public Health Department has to rectify the same at its own cost and make it good/original standards. If it has to cross minors/ sub minors, cross drainage works have to be constructed by the Public Health Department as per the norms of the Water Resources Department, drawings approved by the Water Resources Department and under the supervision of the Water Resources Department Officials.
- 13) Pump house should be constructed away from the channel bund duly considering G.O.Ms.No.119, dated:28.03.2017.
- 14) Intake well and allied structures etc., should be constructed as per the norms of Water Resources Department and under the supervision of the Water Resources Departmental Officers.
- 15) Water measuring devices should be placed at the suitable places along with proper locking arrangements and shuttering and regulating arrangements must be made with their own cost and it is kept under the control of the Water Resources Department.
- 16) The operation of Water measuring devices shall be under the control of Water Resources Department only.
- 17) The Public Health Department should make its own arrangements for sufficient storage of water during non supply period.
- 18) The Water Resources Department is no way responsible for non supply of water due to any reasons.
- 19) The Water Resources Department is no way responsible for any damages that may occur during floods.
- 20) The Public Health Department should not create any objection for improvement /modernisation works to the said reservoir.

(P.T.O)

- 21) The beneficiary is to abide by any other conditions laid down by the Water Resources Department from time to time.
 - 22) The Public Health Department should get the lease of land on which the intake and other related structures are proposed in the future, and they have to relocate intake structure etc., at their own cost if necessary.
 - 23) The quantity of water allotted to Public Health Department for drinking water needs of Chittoor Municipal Corporation duly considering 4 fillings in the reservoir and hence the raw water may be drawn by the Public Health Department as per prorata basis and availability of water in the reservoir.
2. The Chief Engineer, NTR Telugu Ganga Project, Tirupati shall take necessary further action in the matter.

(BY ORDER AND IN THE NAME OF THE GOVERNOR OF ANDHRA PRADESH)
